

measurement chart

shoes collar cup size size

That's how you measure correctly ...

To calculate your under-chest girth you measure underneath your breast and all around your body.

The measuring tape should lie against your body - lightly firm but not too tight.

To calculate your cup size, please measure around your body but at the widest part of your breast.

under-chest grith		cup size <i>(please select the measure which matches your measurements the closest)</i>								
size	measure width	AA	A	B	C	D	E	F	G	F
65	63 - 67 cm	75	77,5	80	-	-	-	-	-	-
